

a processor coupled to said wager means to activate a random generator means to generate a primary game on said display upon activation of said wager means,

a first bonus game enabled by a certain outcome from said primary game, and a second bonus game enabled by a certain outcome from said first bonus game wherein said second bonus game is also accessed by an outcome from said primary game and wherein said first bonus game is defined by a path which is to be traversed, spots on said path resulting in credits should a player land thereon and a terminus of said path leading to said second bonus.

Claim 4 (amended) - A gaming method, the steps including:

accepting a wager,

displaying a primary game,

providing a primary game first outcome which leads to a first bonus game embodied as a pathway,

providing a first bonus game outcome which leads to a second bonus game embodied as a pathway and providing a primary game second outcome which leads to said second bonus game.

Claim 6 (amended) - The device of claim 2 wherein spaces are provided on said path which end said first bonus game should the player land thereon.

Claim 7 (amended) - The device of claim 6 wherein said second bonus game includes a road upon which a vehicle travels and plural establishments along said road, and the player is awarded credits when the vehicle stops at an establishment.
